

Ketra's Natural Light solution supports a nourishing living environment that is completely customizable.

"The right light at any time of day is like a cup of coffee."

Mariana G. Figueiro, PhD, Lighting Research Center

Aesthetics

- Light beautifully renders finishes and textures to always look their best
- Override Natural setting to select the right light for any occasion
- Full color spectrum creates a palette of moods and colored lights for entertaining

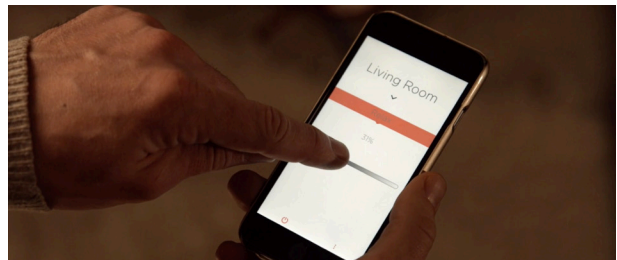

Wellness

- Cool, bright sunlight energizes in the morning, warm light relaxes in the evening
- Ketra mimics natural sunlight by shifting color temperature and intensity throughout the day

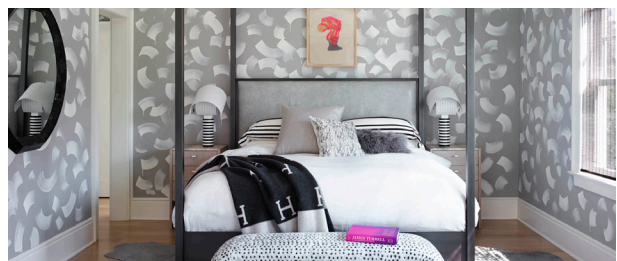

Convenience

- Use pre-curated content selected by experts or set your own custom scenes
- Use Ketra wall stations or mobile app to control all the lights in the house
- Integrates with leading home automation systems

Safety

- Night light level dimming provides subtle glow for hallways and stairs at night
- Control all interior and exterior lights with one button before entering or from your bedside
- Integrates with leading home security systems

Fixtures

Integrated Fixtures D3 and D4R Retrofit Lamps S30, S38, and A20 Lamps

- Lamps screw into standard light fixtures
- Wireless control adjusts brightness and color
- Tunable white from warm to cool
- Select from infinite color options
- 50,000+ hour lifetime, longer than average home ownership

X2 Keypad

- Keypads replace standard wall switches, providing more choices in each room
- Compatibility with standard faceplates makes for an easy install
- Powerful enough to control all the lighting in your home
- Up/down arrows dim to 0.1% brightness
- Pre-programmed circadian lighting along with other content options selected by lighting experts

N4 Hub

- Creates a bridge between installed lighting and digital interfaces
- Built-in astronomical time clock
- Allows for wireless control of up to 50 lights and keypads
- Multiple hubs cascade to support larger networks

Mobile App

- Instantly change lighting from anywhere within your home WiFi network
- Available through the App Store and Google Play for phones and tablets

Lutron Integration

- Easily integrates with existing home controls
- Recall scenes or shows, or change intensity and color of individual light groups
